DIRECTION
Software LLP

Summary

This Company is one of the premier ecommerce companies in the world and they source goods worldwide for selling to their (mainly) European & clients. When their new Strategic Buying Department wanted to automate their procurement process with an online reverse auction in 2005, they chose Direction Software LLP to partner in this project. This solution consists of an all-round support to them, right from Conceptualizing to Development and comprehensive Back Office Support.

Direction Software LLP staff were closely involved in the initial workshop to lay out the scope of the project and provide inputs on functionality maintenance.

Challenges: Multiple Requirements

- The client wanted an online reverse auction system for procurement that would allow various buying departments to create their own reverse auctions choosing from a bank of suppliers for participating.
- The Strategic Buying department of this company (BOSB) wanted Bundled auctions for procuring.
- The client wanted to outsource maintenance and QC of styles as well as support and training to their suppliers.
- Back Office support required for the Strategic Buying department of this company (BOSB) to handle all round support.

Solutions: 360° Support

Direction Software LLP was involved with the client right from the start and took active part in defining the functional requirements, application development, deployment, hosting, support and back office admin activities. The application has continued to evolve over the last 16 years and Direction Software LLP continue to support this project in all areas even in 2021.

Support Activities:

- Complete user management user training.
- Hotline support to Office, Suppliers and Buyers during auctions.
- Creating Masters Data on site including relation with different Entities.
- Updating styles periodically.
- Do QC for faulty xml data of automatically imported styles and re-import them.
- Site Admin activities involving user creation and assigning department and supplier rights.

Consulting Activities:

- Coordinating with Clients in understanding requirements /changes.
- Liaising with developers and ensuring the system is delivered as per specifications.
- UAT of all new development by Direction Software LLP.
- Preparing user manuals for users.
- Weekly conference call with the clients.
