

Copilot in Dynamics

Microsoft Dynamics 365 Business Central is now even more potent with the integration of AI-powered Copilot capabilities.

1

Natural Language

Ask anything in plain language and Copilot will process your query and provide a clear, concise answer.

2

Automated Tasks

Copilot can create professional documents, automatically populate fields and forms, and even assist with code generation.

3

Intelligent Insights

Copilot can identify trends and patterns in your data to make informed decisions and provide tailored recommendations.

4

Enhanced Collaboration

Copilot can help teams collaborate seamlessly by sharing insights and asking questions directly within the application.

Copilot's Power

Copilot can help businesses automate routine tasks, gain valuable insights, and provide enhanced customer experiences.
